Coloplast Ostomy Powder – Code 0190

In addition all Substances of Very High Concern (SVHC) present in the product at a concentration above 0.1% should be stated in this short MSDS in order to comply with EC 1907/200, article IV, §33.

Disposal considerations

The recommended disposal technology at any approved facility. The disposal should always be in compliance with national, federal, state and local regulations. The product should not be discharged to the environment.

US

This product does not meet the criteria for hazardous waste as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Under normal private use the product may be disposed of together with other household waste per RCRA 40 RFT 261.4.B1.

European Union

Per The European Waste Catalogue (EWC), in accordance with EC Directive 75/422/EEC, the following Waste Code can be used: 18 01 04 00 wastes whose collection and disposal is not subject to special requirements in view of the prevention of infection (e.g. dressings, plaster casts, linen, disposable clothing, diapers). However, if the waste in view of the prevention of infection needs special requirements, other Waste Codes should be used. It is the responsibility of the disposed of together with other household waste.

Handling and storage

Handling: See instruction for use

Storage: Store until use as supplied and at room temperature unless other information is stated on the packaging or on the leaflet.

Other information

This MSDS is supplied as an additional service to the customer. The product is a medical device, which is regulated under the Council Directive 93/42/EEC, Medical Device Directive. Medical devices do not require a MSDS for hazard communication and therefore this MSDS is not a 16 point data sheet. The product has been evaluated according to the requirements of medical devices. According to current knowledge this product is considered non-toxic. For further information please contact Coloplast A/S.
