## 2.3 Other hazards

### ◆ Results of PBT and vPvB assessment

| Component                                               | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|---------------------------------------------------------|---------------------------------------------------------------------|
| STYRENE/ISOPRENE COPOLYMER                              | Insufficient information, temporarily unable to evaluate            |
| HYDROGENATED POLY(C6-20 OLEFIN)                         | Insufficient information, temporarily unable to evaluate            |
| PARAFFINUM LIQUIDUM                                     | Insufficient information, temporarily unable to evaluate            |
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNA MATE | Not PBT/vPvB                                                        |
| CELLULOSE GUM                                           | Insufficient information, temporarily unable to evaluate            |
| POLYISOBUTENE                                           | Insufficient information, temporarily unable to evaluate            |
| PROPYLENE GLYCOL                                        | Not PBT/vPvB                                                        |
| HYDROGENATED ROSIN                                      | Not PBT/vPvB                                                        |
| PVP                                                     | Insufficient information, temporarily unable to evaluate            |
| SALICYLIC ACID                                          | Not PBT/vPvB                                                        |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT              | Insufficient information, temporarily unable to evaluate            |
| MELALEUCA ALTERNIFOLIA (TEA TREE) LEAF OIL              | Insufficient information, temporarily unable to evaluate            |
| CENTELLA ASIATICA EXTRACT                               | Insufficient information, temporarily unable to evaluate            |

### ◆ Results of endocrine disrupting properties assessment

| Component                                              | Results of endocrine disrupting properties assessment [according to (EU) No 2017/2100 or (EU) No 2018/605] |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| STYRENE/ISOPRENE COPOLYMER                             | Insufficient information, temporarily unable to evaluate                                                   |
| HYDROGENATED POLY(C6-20 OLEFIN)                        | Insufficient information, temporarily unable to evaluate                                                   |
| PARAFFINUM LIQUIDUM                                    | Insufficient information, temporarily unable to evaluate                                                   |
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE | Insufficient information, temporarily unable to evaluate                                                   |
| CELLULOSE GUM                                          | Insufficient information, temporarily unable to evaluate                                                   |
| POLYISOBUTENE                                          | Insufficient information, temporarily unable to evaluate                                                   |
| PROPYLENE GLYCOL                                       | Insufficient information, temporarily unable to evaluate                                                   |
| HYDROGENATED ROSIN                                     | Insufficient information, temporarily unable to evaluate                                                   |
| PVP                                                    | Insufficient information, temporarily unable to evaluate                                                   |
| SALICYLIC ACID                                         | Insufficient information, temporarily unable to evaluate                                                   |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT             | Insufficient information, temporarily unable to evaluate                                                   |
| MELALEUCA ALTERNIFOLIA (TEA TREE) LEAF OIL             | Insufficient information, temporarily unable to evaluate                                                   |
| CENTELLA ASIATICA EXTRACT                              | Insufficient information, temporarily unable to evaluate                                                   |

## 4 First-aid measures

## 4.1 Description of first aid measures

|                            |                                                                                                                                                |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| General advice             | Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.                                        |
| Eye contact                | Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.                                   |
| Skin contact               | No harm in general situation. First aid is not needed.                                                                                         |
| Ingestion                  | Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.                                  |
| Inhalation                 | Move victim into fresh air. If breathing is difficult, give oxygen.                                                                            |
| Protecting of first-aiders | Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination. |

## 4.2 Most important symptoms/effects, acute and delayed

|   |                        |
|---|------------------------|
| 1 | Please see section 11. |
|---|------------------------|

## 4.3 Indication of any immediate medical attention and special treatment needed

|   |                          |
|---|--------------------------|
| 1 | Treat symptomatically.   |
| 2 | Symptoms may be delayed. |

## 5 Fire-fighting measures

### 5.1 Extinguishing media

|                                |                                                                        |
|--------------------------------|------------------------------------------------------------------------|
| Suitable extinguishing media   | Use extinguishing media suitable for surrounding area.                 |
| Unsuitable extinguishing media | There is no restriction on the type of extinguisher which may be used. |

### 5.2 Specific hazards arising from the substance or mixture

|   |                                                                                   |
|---|-----------------------------------------------------------------------------------|
| 1 | Development of hazardous combustion gases or vapor possible in the event of fire. |
| 2 | May expansion or decompose explosively when heated or involved in fire.           |

### 5.3 Advice for firefighters

|   |                                                                                                                       |
|---|-----------------------------------------------------------------------------------------------------------------------|
| 1 | As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear. |
| 2 | Fight fire from a safe distance, with adequate cover.                                                                 |
| 3 | Prevent fire extinguishing water from contaminating surface water or the ground water system.                         |

## 6 Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

|   |                                                                                                                     |
|---|---------------------------------------------------------------------------------------------------------------------|
| 1 | Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges. |
| 2 | Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.                                   |
| 3 | Use personal protective equipment, do not breathe dust/fume.                                                        |

### 6.2 Environmental precautions

|   |                                                       |
|---|-------------------------------------------------------|
| 1 | Prevent further leakage or spillage if safe to do so. |
| 2 | Discharge into the environment must be avoided.       |

### 6.3 Methods and materials for containment and cleaning up

|   |                                                                                                                                         |
|---|-----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Cut off the source of the leak as much as possible.                                                                                     |
| 2 | Keep leaks in a ventilated place.                                                                                                       |
| 3 | Isolation of contaminated areas and restrictions on access.                                                                             |
| 4 | It is recommended that emergency personnel wear dust masks.                                                                             |
| 5 | Collect the spill with a clean shovel and place it in a clean, dry, loosely closed container and move the container away from the leak. |
| 6 | Adhered or collected material should be promptly disposed of, in accordance with appropriate laws and regulations.                      |

## 6.4 Reference to other sections

|   |                                                                            |
|---|----------------------------------------------------------------------------|
| 1 | Personal Protective Equipment advice is contained in Section 8 of the SDS. |
| 2 | Disposal considerations advice is contained in Section 13 of the SDS.      |

## 7 Handling and storage

### 7.1 Precautions for safe handling

#### ◆ Protective measures

|   |                                                   |
|---|---------------------------------------------------|
| 1 | Handling is performed in a well ventilated place. |
| 2 | Wear suitable protective equipment.               |
| 3 | Avoid contact with eyes.                          |

#### ◆ Measures to prevent fire

|   |                                                       |
|---|-------------------------------------------------------|
| 1 | Keep away from heat/sparks/open flames/ hot surfaces. |
|---|-------------------------------------------------------|

#### ◆ Measures to prevent aerosol and dust generation

|   |                                                                         |
|---|-------------------------------------------------------------------------|
| 1 | Avoid formation of dust and aerosols.                                   |
| 2 | Provide appropriate exhaust ventilation at places where dust is formed. |

#### ◆ Advice on general occupational hygiene

|   |                                                    |
|---|----------------------------------------------------|
| 1 | Wash hands and face after using of the substances. |
| 2 | Replace the contaminated clothing immediately.     |

### 7.2 Conditions for safe storage, including any incompatibilities

|   |                                                                  |
|---|------------------------------------------------------------------|
| 1 | Keep containers tightly closed.                                  |
| 2 | Keep containers in a dry, cool and well-ventilated place.        |
| 3 | Keep away from heat/sparks/open flames/hot surfaces.             |
| 4 | Store away from incompatible materials and foodstuff containers. |

### 7.3 Specific end use(s)

|   |                                                                                      |
|---|--------------------------------------------------------------------------------------|
| 1 | In addition to use mentioned in the Section 1.2, unforeseen other specific end uses. |
|---|--------------------------------------------------------------------------------------|

## 8 Exposure controls/personal protection

### 8.1 Control parameters

| Component | Country/Region | Limit value - Eight hours |                   | Limit value - Short term |                   |
|-----------|----------------|---------------------------|-------------------|--------------------------|-------------------|
|           |                | ppm                       | mg/m <sup>3</sup> | ppm                      | mg/m <sup>3</sup> |

|                     |                |                              |                              |   |    |
|---------------------|----------------|------------------------------|------------------------------|---|----|
| PARAFFINUM LIQUIDUM | Denmark        | -                            | 1                            | - | 2  |
|                     | Netherlands    | -                            | 5                            | - | -  |
|                     | Norway         | -                            | 1                            | - | -  |
|                     | Spain          | -                            | 5                            | - | 10 |
|                     | Sweden         | -                            | 1                            | - | 3  |
|                     | Switzerland    | -                            | 5                            | - | -  |
| PROPYLENE GLYCOL    | Norway         | 25                           | 79                           | - | -  |
|                     | Poland         | -                            | 100                          | - | -  |
|                     | United Kingdom | -                            | 10(particulates)             | - | -  |
|                     | Ireland        | 150(vapour and particulates) | 470(vapour and particulates) | - | -  |
|                     | Latvia         | -                            | 7                            | - | -  |
|                     | New Zealand    | 150                          | 474                          | - | -  |

## ◆ Biological limit values

| Biological limit values | No relevant regulations |
|-------------------------|-------------------------|
|-------------------------|-------------------------|

## ◆ Monitoring methods

|   |                                                                                                                                                   |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | EN 14042 Workplace atmospheres. Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents. |
| 2 | GBZ/T 300 series standard Determination of toxic substances in workplace air.                                                                     |

## ◆ Derived No effect level (DNEL)

| Component                                               | Route of exposure | DNEL for Workers      |                          |                         |                            |
|---------------------------------------------------------|-------------------|-----------------------|--------------------------|-------------------------|----------------------------|
|                                                         |                   | Acute effects (local) | Acute effects (systemic) | Chronic effects (local) | Chronic effects (systemic) |
| STYRENE/ISOPRENE COPOLYMER                              | Inhalation        | No data available     | No data available        | No data available       | No data available          |
|                                                         | Oral              | No data available     | No data available        | No data available       | No data available          |

| CENTELLA ASIATICA EXTRACT                  | Inhalation | No data available | No data available | No data available | 16.4 mg/m3        |
|                                            | Oral       | No data available | No data available | No data available | No data available |
|                                            | Dermal     | No data available | No data available | No data available | No data available |

## ◆ Predicted No Effect Concentration (PNEC)

|                                          |                          |
|------------------------------------------|--------------------------|
| Predicted No Effect Concentration (PNEC) | No information available |
|------------------------------------------|--------------------------|

## | 8.2 Exposure controls

### | 8.2.1 Engineering controls

|   |                                                                                        |
|---|----------------------------------------------------------------------------------------|
| 1 | Ensure adequate ventilation, especially in confined areas.                             |
| 2 | Ensure that eyewash stations and safety showers are close to the workstation location. |
| 3 | Use explosion-proof electrical/ventilating/lighting/equipment.                         |
| 4 | Set up emergency exit and necessary risk-elimination area.                             |

## 8.2.2 Personal protection equipment

|                          |                                                                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General requirement      | No special requirements, please see the description below.                                                                                                                                |
| Eye protection           | In general situation, eye protection is not needed. In the production process, when contacting with vapour or dust, tightly fitting safety goggles.                                       |
| Hand protection          | In general situation, hand protection is not needed.                                                                                                                                      |
| Respiratory protection   | In general situation, respiratory protection is not needed. If exposure limits are exceeded or if irritation or other symptoms are experienced, wear dust proof mask or gas defence mask. |
| Skin and body protection | In general situation, skin and body protection are not needed.                                                                                                                            |

## 8.2.3 Environmental exposure controls

|                                 |                          |
|---------------------------------|--------------------------|
| Environmental exposure controls | No information available |
|---------------------------------|--------------------------|

# 9 Physical and chemical properties

## 9.1 Information on basic physical and chemical properties

|                                             |                                                                            |
|---------------------------------------------|----------------------------------------------------------------------------|
| Physical state                              | Paste                                                                      |
| Colour                                      | White                                                                      |
| Odor                                        | No special odor                                                            |
| Odor threshold                              | No information available                                                   |
| pH                                          | Not applicable                                                             |
| Melting point/freezing point(°C)            | < -15 (PARAFFINUM LIQUIDUM)                                                |
| Initial boiling point and boiling range(°C) | 260 (PARAFFINUM LIQUIDUM)                                                  |
| Flash point(Closed cup,°C)                  | Not applicable                                                             |
| Evaporation rate                            | Not applicable                                                             |
| Flammability                                | Not flammable                                                              |
| Upper/lower explosive limits[% (v/v)]       | Upper limit: No information available; Lower limit: 2.6 (PROPYLENE GLYCOL) |
| Vapor pressure                              | 10.6Pa (20°C,PROPYLENE GLYCOL)                                             |
| Vapor density(Air = 1)                      | > 1 (STYRENE/ISOPRENE COPOLYMER)                                           |
| Relative density(Water=1)                   | 0.92 (STYRENE/ISOPRENE COPOLYMER)                                          |
| Solubility                                  | Partly miscible with water                                                 |
| n-octanol/water partition coefficient       | 23 (PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE)                |
| Auto-ignition temperature(°C)               | 383~399 (HYDROGENATED POLY(C6-20 OLEFIN))                                  |
| Decomposition temperature(°C)               | > 350 (PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE)             |
| Kinematic viscosity                         | Not applicable                                                             |
| Explosive properties                        | Not explosive                                                              |
| Oxidizing properties                        | Not oxidizing                                                              |
| Particle characteristics                    | No information available                                                   |

## 9.2 Other information

### 9.2.1 Information with regard to physical hazard classes

|                                                    |                          |
|----------------------------------------------------|--------------------------|
| Information with regard to physical hazard classes | No information available |
|----------------------------------------------------|--------------------------|

9.2.2 Other safety characteristics

|                              |                          |
|------------------------------|--------------------------|
| Other safety characteristics | No information available |
|------------------------------|--------------------------|

10 Stability and reactivity

Stability and reactivity

|                                         |                                                                                                      |
|-----------------------------------------|------------------------------------------------------------------------------------------------------|
| 10.1 Reactivity                         | Contact with incompatible substances can cause decomposition or other chemical reactions.            |
| 10.2 Chemical stability                 | Stable under proper operation and storage conditions.                                                |
| 10.3 Possibility of hazardous reactions | No information available.                                                                            |
| 10.4 Conditions to avoid                | Incompatible materials, heat, flame and spark.                                                       |
| 10.5 Incompatible materials             | No information available.                                                                            |
| 10.6 Hazardous decomposition products   | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

11 Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

| SAKITEYA Acne Patch           |                                                                  |
|-------------------------------|------------------------------------------------------------------|
| Skin corrosion/irritation     | Based on available data, the classification criteria are not met |
| Serious eye damage/irritation | Based on available data, the classification criteria are not met |
| Skin sensitization            | Based on available data, the classification criteria are not met |
| Respiratory sensitization     | Based on available data, the classification criteria are not met |
| Reproductive toxicity         | Based on available data, the classification criteria are not met |
| STOT-single exposure          | Based on available data, the classification criteria are not met |
| STOT-repeated exposure        | Based on available data, the classification criteria are not met |
| Aspiration hazard             | Based on available data, the classification criteria are not met |
| Germ cell mutagenicity        | Based on available data, the classification criteria are not met |

Acute toxicity

| Component           | LD50(oral)        | LD50(dermal)             | LC50(inhalation,4h)      |
|---------------------|-------------------|--------------------------|--------------------------|
| CELLULOSE GUM       | 27000mg/kg(Rat)   | > 2000mg/kg(Rabbit)      | > 5.8mg/L(Rat)           |
| PROPYLENE GLYCOL    | 20000mg/kg(Rat)   | 20800mg/kg(Rabbit)       | No information available |
| PARAFFINUM LIQUIDUM | > 24000mg/kg(Rat) | No information available | No information available |
| PVP                 | 100000mg/kg(Rat)  | No information available | No information available |
| SALICYLIC ACID      | 891mg/kg(Rat)     | > 10000mg/kg(Rabbit)     | No information available |

Carcinogenicity

| Component | List of carcinogens by the IARC Monographs | Report on Carcinogens by NTP |

12 Ecological information

12.1 Toxicity

Acute aquatic toxicity

| Component                 | Fish                                     | Crustaceans                                     | Algae                                      |
|---------------------------|------------------------------------------|-------------------------------------------------|--------------------------------------------|
| CELLULOSE GUM             | No information available                 | EC <sub>50</sub> : 87.3mg/L (48h)(Crustaceans)  | No information available                   |
| PROPYLENE GLYCOL          | LC <sub>50</sub> : > 100mg/L (96h)(Fish) | EC <sub>50</sub> : >1000mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : >1000mg/L (72h)(Algae) |
| CENTELLA ASIATICA EXTRACT | No information available                 | EC <sub>50</sub> : > 100mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 15.85mg/L (72h)(Algae) |
| SALICYLIC ACID            | LC <sub>50</sub> : 39mg/L (96h)(Fish)    | EC <sub>50</sub> : 77mg/L (48h)(Crustaceans)    | ErC <sub>50</sub> : 65mg/L (72h)(Algae)    |

Chronic aquatic toxicity

| Component        | Fish                     | Crustaceans                 | Algae                 |
|------------------|--------------------------|-----------------------------|-----------------------|
| PROPYLENE GLYCOL | NOEC: >100mg/L(Fish)     | NOEC: 1000mg/L(Crustaceans) | NOEC: 1000mg/L(Algae) |
| SALICYLIC ACID   | No information available | NOEC: 34mg/L(Crustaceans)   | NOEC: 31mg/L(Algae)   |

12.2 Persistence and degradability

| Component                                              | Persistence (water/soil) | Persistence (air) |
|--------------------------------------------------------|--------------------------|-------------------|
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE | High                     | High              |
| POLYISOBUTENE                                          | Low                      | Low               |
| PROPYLENE GLYCOL                                       | Low                      | Low               |
| PVP                                                    | Low                      | Low               |
| SALICYLIC ACID                                         | Low                      | Low               |
| HAMAMELIS                                              | Low                      | Low               |

|                                  |      |      |
|----------------------------------|------|------|
| VIRGINIANA (WITCH HAZEL) EXTRACT |      |      |
| CENTELLA ASIATICA EXTRACT        | High | High |

### 12.3 Bioaccumulative potential

| Component                                              | Bioaccumulative potential | Comments        |
|--------------------------------------------------------|---------------------------|-----------------|
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE | Low                       | BCF=2.3         |
| POLYISOBUTENE                                          | Low                       | Log Kow=2.2256  |
| PROPYLENE GLYCOL                                       | Low                       | BCF=1           |
| PVP                                                    | Low                       | Log Kow=0.2484  |
| SALICYLIC ACID                                         | Medium                    | BCF=1000        |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT             | Low                       | Log Kow=-1.1089 |
| CENTELLA ASIATICA EXTRACT                              | Low                       | Log Kow=-0.3029 |

### 12.4 Mobility in soil

| Component                                  | Mobility in soil | Soil Organic Carbon-Water Partitioning Coefficient (Koc) |
|--------------------------------------------|------------------|----------------------------------------------------------|
| POLYISOBUTENE                              | Low              | 35.04                                                    |
| PROPYLENE GLYCOL                           | High             | 1                                                        |
| PVP                                        | Low              | 40.46                                                    |
| SALICYLIC ACID                             | Low              | 23.96                                                    |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT | Low              | 26.19                                                    |
| CENTELLA ASIATICA EXTRACT                  | Low              | 4251000                                                  |

### 12.5 Results of PBT and vPvB assessment

| Component                                              | Results of PBT and vPvB assessment [according to (EC) No 1907/2006] |
|--------------------------------------------------------|---------------------------------------------------------------------|
| STYRENE/ISOPRENE COPOLYMER                             | Insufficient information, temporarily unable to evaluate            |
| HYDROGENATED POLY(C6-20 OLEFIN)                        | Insufficient information, temporarily unable to evaluate            |
| PARAFFINUM LIQUIDUM                                    | Insufficient information, temporarily unable to evaluate            |
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE | Not PBT/vPvB                                                        |

|                                            |                                                          |
|--------------------------------------------|----------------------------------------------------------|
| MATE                                       |                                                          |
| CELLULOSE GUM                              | Insufficient information, temporarily unable to evaluate |
| POLYISOBUTENE                              | Insufficient information, temporarily unable to evaluate |
| PROPYLENE GLYCOL                           | Not PBT/vPvB                                             |
| HYDROGENATED ROSIN                         | Not PBT/vPvB                                             |
| PVP                                        | Insufficient information, temporarily unable to evaluate |
| SALICYLIC ACID                             | Not PBT/vPvB                                             |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT | Insufficient information, temporarily unable to evaluate |
| MELALEUCA ALTERNIFOLIA (TEA TREE) LEAF OIL | Insufficient information, temporarily unable to evaluate |
| CENTELLA ASIATICA EXTRACT                  | Insufficient information, temporarily unable to evaluate |

12.6 Endocrine disrupting properties

| Component                                              | Endocrine disrupting properties |
|--------------------------------------------------------|---------------------------------|
| STYRENE/ISOPRENE COPOLYMER                             | No information available        |
| HYDROGENATED POLY(C6-20 OLEFIN)                        | No information available        |
| PARAFFINUM LIQUIDUM                                    | No information available        |
| PENTAERYTHRITYL TETRA-DI-t-BUTYL HYDROXYHYDROCINNAMATE | No information available        |
| CELLULOSE GUM                                          | No information available        |
| POLYISOBUTENE                                          | No information available        |
| PROPYLENE GLYCOL                                       | No information available        |
| HYDROGENATED ROSIN                                     | No information available        |
| PVP                                                    | No information available        |
| SALICYLIC ACID                                         | No information available        |
| HAMAMELIS VIRGINIANA (WITCH HAZEL) EXTRACT             | No information available        |
| MELALEUCA ALTERNIFOLIA (TEA TREE) LEAF OIL             | No information available        |
| CENTELLA ASIATICA EXTRACT                              | No information available        |

12.7 Other adverse effects

No information available

## 13 Disposal considerations

### 13.1 Waste treatment methods

|                          |                                                                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste chemicals          | Before disposal should refer to the relevant national and local laws and regulation. Recommend the use of incineration disposal.                       |
| Contaminated packaging   | Containers may still present chemical hazard when empty. Keep away from hot and ignition source of fire. Return to supplier for recycling if possible. |
| Disposal recommendations | Refer to section waste chemicals and contaminated packaging.                                                                                           |

## 14 Transport information

### Label and Mark

|                    |                |
|--------------------|----------------|
| Transporting Label | Not applicable |
|--------------------|----------------|

### IMDG-CODE

|           |                                                |
|-----------|------------------------------------------------|
| IMDG-CODE | NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS |
|-----------|------------------------------------------------|

### IATA-DGR

|          |                                                |
|----------|------------------------------------------------|
| IATA-DGR | NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS |
|----------|------------------------------------------------|

### UN-ADR

|        |                                                |
|--------|------------------------------------------------|
| UN-ADR | NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS |
|--------|------------------------------------------------|

### Maritime transport in bulk according to IMO instruments

- ◆ Transport in bulk according to Annex II of MARPOL and the IBC code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

- ◆ Transport in bulk in accordance with MARPOL Annex V and the IMSBC Code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

- ◆ Transport in bulk in accordance with the IGC Code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

## 15 Regulatory information

|                  |                                      |           |                                                           |
|------------------|--------------------------------------|-----------|-----------------------------------------------------------|
| PC-STEL          | Short term exposure limit            | OECD      | Organization for Economic Co-operation and Development    |
| PC-TWA           | Time Weighted Average                | IMDG-CODE | International Maritime Dangerous Goods CODE               |
| MAC              | Maximum Allowable Concentration      | IARC      | International Agency for Research on Cancer               |
| DNEL             | Derived No Effect Level              | ICAO      | International Civil Aviation Organization                 |
| PNEC             | Predicted No Effect Concentration    | IATA      | International Air Transportation Association              |
| NOEC             | No Observed Effect Concentration     | ACGIH     | American Conference of Governmental Industrial Hygienists |
| LC <sub>50</sub> | Lethal Concentration 50%             | NFPA      | National Fire Protection Association                      |
| LD <sub>50</sub> | Lethal Dose 50%                      | NTP       | National Toxicology Program                               |
| EC <sub>50</sub> | Effective Concentration 50%          | PBT       | Persistent, Bioaccumulative, Toxic                        |
| EC <sub>x</sub>  | Effective Concentration X%           | vPvB      | very Persistent, very Bioaccumulative                     |
| Pow              | Partition coefficient Octanol: Water | CMR       | Carcinogens, mutagens or substances toxic to reproduction |
| BCF              | Bioconcentration factor              | RPE       | Respiratory Protective Equipment                          |
| ED               | Endocrine disruptor                  |           |                                                           |

## Disclaimer

This Safety Data Sheet (SDS) was prepared according to REACH Regulation. The data included was derived from international authoritative database and provided by the enterprise. Other information was based on the present state of our knowledge. We try to ensure the correctness of all information. However, due to the diversity of information sources and the limitations of our knowledge, this document is only for user's reference. Users should make their independent judgment of suitability of this information for their particular purposes. We do not assume responsibility for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.

## Remark

This testing report revised the content of "The part 2: Hazards identification" based on the original report (Report No. A2240606747102003). This testing report displaces the original report of No. A2240606747102003, and the original one No. A2240606747102003 was invalid since the date of this testing report released.
