Batch identification system

P&M Innovation LTD is using Julian batch coding system, plus batch letter, which is ink jetted on the base of the bottle / jar or included in the crimp of the tube. The batch letter is added to the end of the date code to form a 5 figure batch code.

For example: the code '3104C' means 14th of April 2023, batch C.

- 3 = last number of year 2023
- 104 = indicates the day in the year as indicated on the 'Julian' calendar, in this instance 14th of April
- C = liquid bulk batch code C
